**“The Struggle
for Power” by
John Grover**

**“Fix the Nuclear
Paradox” by
Les Kemeny**

**Australian Institute
of Energy
Conference June 05**

“Nuclear reactors are today the cleanest and safest way to produce energy. People decided to get frightened about anything nuclear. . . If we want safe and clean energy, we should accept fission reactors. Unfortunately, the fear of the technology is widespread, and will be hard to eradicate. . . . The fear of nuclear energy is perhaps the most obvious manifestation of the fear of progress and technology in general. And if we don't find ways to make the obvious clear to people, to persuade them to accept the best technologies, then I believe America will turn itself into an underdeveloped country.”

— Edward Teller, 1998

Prof Edward Teller with President Ronald Reagan.
